

MONTREAL COLLEGE IT

Spring Framework for Enterprise Applications **Instructor Hamit Pena Sierra** **Final Exam**

1. Using Spring MVC and JDBC, create an application to insert new countries into the Countries table in the HR schema
2. The application must provide a form that validates the following:
 - a. The country's name can't be null
3. Any error in the form validation should be displayed at the top of the form
4. After inserting a new country, the application must show a success message and display the list of all the countries in the table, showing its name, id and region's name

Important:

You must send the resulting project in a zip file and upload it using Omnivox
